

One Page Budget

Andres Romero, Randal Guzman, Esteban Navar, Carlos Adrian Yanez Duron

Cost Drivers:

<i>Cost Driver</i>	<i>Owner</i>
Labor	Andres
App Store Fees	Randal
Third-party services	Esteban
Backend/Hosting	Carlos

Hours to FTE-Months:

<i>Method</i>	<i>Effort (hrs, low/mid/high)</i>	<i>FTE-Months (low/mid/high)</i>
Story points	371 / 464 / 619	2.85 / 3.57 / 4.76
Analogous (AUTOsist)	448 / 664 / 880	3.45 / 5.11 / 6.77

4.34 FTE-months on average

Team Capacity

<i>Input</i>	<i>Value</i>
Hours per person per sprint	80
Team size	4
Team hours per sprint	320
Sprints per month	2
Team hours per month	640
Team FTE-months supplied, per month	$640 \div 130 = 4.92$

Roles-by-Month Staffing Table

<i>Role</i>	<i>Month 1 (FTE)</i>
PM / Backend — Andres Romero	1.23
Backend/API — Randal Guzman	1.23
Frontend/UI — Esteban Navar	1.23
QA/Docs — Carlos Adrian Yanez Duron	1.23
Total	4.92

Loaded Labor Rate:

Base rate: \$50/hr

Burden factor: x1.4

Loaded rate = \$50 x 1.4 = \$70/hr

Labor Cost:

Labor cost = 4.34 FTE-months x 130 hrs x \$70/hr = \$39,494

Non-labor checklist:

Apple Developer: \$99/year

Google Play: \$25 one-time

Domain: \$15/year

SSL, push notifications, VIN API: \$0

Total: \$139

Base build estimate = \$39,633

Annual Operating Cost

Apple renewal (\$99) + domain (\$15) + hosting (\$0–240) ≈ \$114–354/year

Contingency Reserve

<i>Risk</i>	<i>Chance</i>	<i>Impact</i>	<i>EMV</i>
Manual data entry	30%	\$3,500	\$1,050
Push notification reliability	25%	\$2,800	\$700
Unvalidated velocity estimate	50%	\$4,200	\$2,100
Contingency reserve			\$3,850

Full Budget Request

<i>Line</i>	<i>Amount</i>
Base build estimate	\$39,633
Contingency reserve	\$3,850
Cost baseline	\$43,483
Management reserve (5%)	\$2,174
Total budget request	\$45,657
Operating cost (separate line)	\$114–354/year
